Started giving training

Adequate training and development was provided for enhancing the quality of output achieved.

17/09/2020

Moved to Production

Production, Finance and Inventory went live after the above stages got completed.

Msg from MD

Testimonial

“At first we were a little sceptic about this whole financial automation situation using ERP tools because of our prior experience with SAP B1. We used it for almost 2 to 3 years and somehow found the user interface somewhat difficult to manage. But after coming across ACCU360 ERP my whole perception of the ordeal was changed. The ACCU360 enterprise edition not only is user friendly but also gives me 24*7 access to my accounts. It helps me to monitor & manage my finances very easily and the cloud version makes everything a piece of cake. ACCU360 has made me able to extend our franchise by 14 new branches without investing a cent for the IT infrastructure.”
